**FOR IMMEDIATE DISTRIBUTION**

**Des-Case Corporation Expands Fluid Handling  
Product Line into Western Europe**

**GOODLETTSVILLE, Tenn. (XXX)**—Des-Case Corporation, a leader in contamination control products, is excited to announce the expansion of fluid handling products into the United Kingdom and Ireland with its distribution partner, Des-Case UK.

“Des-Case already offers breather products in Europe so with this launch, we will introduce premium fluid handling systems and help meet the market’s demand for high-quality, high-performance filtration systems,” said Brian Gleason, president and CEO of Des-Case. “Our goal is to be a full-solution provider, and this is one more step in that direction.”

Des-Case redesigned several of its fluid handling products to meet the needs of its European customers. Customers can select features that include flow rate, micron rating, and color. This is the first of a new range of innovative, customizable oil filtration products from Des-Case that will help industrial maintenance professionals achieve lubrication best practices.

“Des-Case UK distributes a full line of breathers and now welcomes a fluid handling line, which creates a one-stop source for a comprehensive line of contamination control products.”

**David Oakton**  
*Managing Director*  
Des-Case UK

“Des-Case UK distributes a full line of breathers and now welcomes a fluid handling line, which creates a one-stop source for a comprehensive line of contamination control products,” said David Oakton, managing director at Des-Case Europe. “We’re looking forward to further additions to the range of portable and dedicated oil filtration equipment, which will be complemented by in-depth training and auditing of lubrication best practices against world-class benchmarks.”

Des-Case plans to add to its fluid handling line in Europe within the next year.

**What's a Filter Cart?**

Industry spends millions of dollars annually treating the negative effects of contamination caused by dirt and moisture. Contaminated lubricating oil and hydraulic fluid result in excess machine wear, production downtime, and repair costs. A filter cart is an ideal tool to remediate these contaminated systems, flush new equipment during commissioning, or periodically decontaminate systems that have inadequate on-board filtration to meet target cleanliness levels.

**About Des-Case Corporation**

Headquartered near Nashville, Tennessee, Des-Case Corporation specializes in contamination control products for industrial lubricants. Founded in 1983, the company markets products designed to help companies make equipment investments last longer. Its trademarked and patented solutions are marketed through an extensive distribution network, private label distributors, and OEM partners. Des-Case's distribution channel consists of more than 500 worldwide distributors. For more information, visit [descase.com](http://descase.com) and [descase-europe.com](http://descase-europe.com).
